A liquid-crystal display (LCD) is a flat-panel display or other electronically modulated optical device that uses the light-modulating properties of liquid crystals. Liquid crystals do not emit light directly, instead using a backlight or reflector to produce images in color or monochrome. LCDs are available to display arbitrary images (as in a general-purpose computer display) or fixed images ...

A tunnel is an underground passageway, dug through the surrounding soil/earth/rock and enclosed except for entrance and exit, commonly at each end. A pipeline is not a tunnel, though some recent tunnels have used immersed tube construction techniques rather than traditional tunnel boring methods.. A tunnel may be for foot or vehicular road traffic, for rail traffic, or for a canal.

1. Introduction. More than half of the global population (~54%) lives in urban areas (United Nations, 2014), while this fraction increases to almost two thirds (72%) in the European Union (European Environment Agency, 2015). Air pollution levels in many European cities are above permissible limits (European Environment Agency, 2013; Guerreiro et al., 2016), making it one of the primary ...

The basic physical principle exploited by body plethysmography is the law of Boyle-Mariotte. For the present purpose this law can be concisely expressed as the statement that for a fixed amount of gas in a closed compartment the relative changes in the compartment's volume are always equal in magnitude but opposite in sign to the relative changes in pressure.
