Preface to the Home Education Series. The educational outlook is rather misty and depressing both at home and abroad. That science should be a staple of education, that the teaching of Latin, of modern languages, of mathematics, must be reformed, that nature and handicrafts should be pressed into service for the training of the eye and hand, that boys and girls must learn to write English and ...

1 Introduction. The repertory grid technique (RGT or RepGrid) is a method for eliciting personal

constructs, i.e. what people think about a given topic. It is based on George Kelly's Personal Construct Theory in 1955 and was also initially developed within this context. Personal Construct Psychology (PCP) states that people's view of objects they interact with is made up of a collection of ...

A black hole is a region of spacetime exhibiting gravitational acceleration so strong that nothing—no particles or even electromagnetic radiation such as light—can escape from it. The theory of general relativity predicts that a sufficiently compact mass can deform spacetime to form a black hole. The boundary of the region from which no escape is possible is called the event horizon.
