The Years of Rice and Salt is an alternate history novel by American science fiction author Kim Stanley Robinson, published in 2002. The novel explores how world history might have been different if the Black Death plague had killed 99% of Europe's population, instead of a third. Divided into ten parts, the story spans hundreds of years, from the army of the Muslim conqueror Timur to the 21st ...

Preface. A thought conceived but not expressed is at best only an unborn child, not only without any influence on the world, but of whose very existence the world may be unconscious; but once brought forth it becomes part of the living working universe, to work there its appointed season, and possibly to leave its mark for good or evil on all successive time.
