History. Tubulin and microtubule-mediated processes, like cell locomotion, were seen by early microscopists, like Leeuwenhoek (1677). However, the fibrous nature of flagella and other structures were discovered two centuries later, with improved light microscopes, and confirmed in the 20th century with the electron microscope and biochemical studies. ...

Microtubule - Wikipedia

History. Historically, equations of motion first appeared in classical mechanics to describe the motion of massive objects, a notable application was to celestial mechanics to predict the motion of the planets as if they orbit like clockwork (this was how Neptune was predicted before its discovery), and also investigate the stability of the solar system.

Equations of motion - Wikipedia

Combinatorial optimisation problems typically involve finding the best arrangement, ordering, or selection of objects. There are numerous applications in Operational Research including scheduling of orders on machines in production industries, routing of vehicles to deliver goods to customers, and assigning of personnel such as nurses or airline crew to work periods.
