I check for understanding using the Classification of Matter Worksheet Answers and individual student work. I notice that there is still some confusion around this topic that has to do with not always understanding how the definitions relate to the examples.

Classification of Matter Worksheet Answers - BetterLesson

Classification of Matter 5 Extension Questions 15. It is often useful to separate matter. Physical methods of separation (filtering, distillation) do not require a chemical change. In other words, no chemical bonds are broken or formed during the separation. Chemical methods of separation (decomposition, electrolysis) require a chemical change.

Classification of Matter - Heroku

Homogeneous and heterogeneous: it's a matter of phases. A sample of matter can contain more than a single phase; a cool drink with ice floating in it consists of at least two phases, the liquid and the ice. If it is a carbonated beverage, you can probably see gas bubbles in it that make up a third phase.
