Over the last hundred years, many techniques have been developed for the solution of ordinary differential equations and partial differential equations. While quite a major portion of the techniques is only useful for academic purposes, there are some which are important in the solution of real problems arising from science and engineering. In this chapter, only very limited techniques for ...

Differential Equations Applications in Physics: Spring & Block with non-zero v_0 ? Assume no friction. Assume the block weighs 5 pounds and that the spring constant $k = 20$ lbs/ft and that the spring is released from the position $x(0) = 4$ inches (that is, stretched by 4 inches) with initial velocity $x'(0) = 40$ ft/sec. Determine $x(t)$.
