A circuit breaker is an automatically operated electrical switch designed to protect an electrical circuit from damage caused by excess current from an overload or short circuit. Its basic function is to interrupt current flow after a fault is detected. Unlike a fuse, which operates once and then must be replaced, a circuit breaker can be reset (either manually or automatically) to resume ...

Guided Wave Technology's Coupling Matrix Synthesis (CMS) software is an easy to use engineering tool for design and analysis of microwave filters. CMS uses coupling matrix synthesis to analyze the performance of any filter topology with respect to filter order, transmission zero placement, loss, return loss, group delay, stored energy, power handling - and so on.
