A quiet PC is a personal computer that makes very little, or no noise. Common uses for quiet PCs include video editing, sound mixing and home theater PCs, but noise reduction techniques can also be used to greatly reduce the noise from servers. There is currently no standard definition for a "quiet PC", and the term is generally not used in a business context, but by individuals and the ...

Substrate selection forms one of the key steps of device fabrication as it provides the foundation on which to construct the biosensor. The resulting properties and functionalities are in turn, dependent on what the substrate can support (Khan et al., 2015, Windmiller and Wang, 2013). By definition, mechanical flexibility is a primary characteristic, as it provides a mechanism to fit the ...
