Perch Dissection Lab Guide SNC 2D1 Background Information Fish are the largest group of vertebrates found in fresh and salt water. In fact, over 25,000 species of fish comprise about 50% of the vertebrate population. Part of the reason for the large numbers of fish is due to how well adapted they are to life in an aquatic environment. In

Perch Dissection Lab Guide - Grygla Public School

When the water is warm, the crayfish will move its legs back and forth even when not walking. If the water is stagnant, the crayfish will climb to the surface and pull air under its carapace and into the gill area (and when it descends, you can see it slowly release small bubbles from a couple of "holes" near where those feathery appendages are).
