Neshaminy Biology Keystone Review VOCABULARY DNA and Genetics Allele: A variation of a gene's nucleotide sequence (an alternative form of a gene). Biotechnology: Any procedure or methodology

that uses biological systems or living organisms to develop or modify either products or processes for specific use.

www.neshaminy.org

DNA and Genetics Vocabulary Heterozygous A “hybrid” genotype, in which an organism carries two different alleles for the same trait. For example, if you have brown eyes, but also carry a blue-eyed gene, then you are heterozygous for eye color. Mutation A change in the order of bases in an organism’s DNA; deletion, insertion or substitution.
