Differential Equations Linear Algebra Student

This book was required for my differential equations and linear algebra class. The only problems are that the chapters don't explain anything clearly at all and the solutions manuals don't show solutions at all. The solutions manual only shows intermediate answers and skips all the nitty-gritty. Anyway it's not very useful.

Solving differential equations in linear algebra. It goes on to say that $x: \mathbb{R} \rightarrow \mathbb{R}^3$ and $x(t)$ is a matrix with one column of the $x_1(t)$, $x_2(t)$, $x_3(t)$. Then it gives me a matrix which is just to coefficients of the above system of equations. Then it gives me a Q and D such that $Q - 1AQ = D$ and $A = QDQ - 1$. I have no clue where these matrices are...
