Elementary algebra encompasses some of the basic concepts of algebra, one of the main branches of mathematics. It is typically taught to secondary school students and builds on their understanding of arithmetic. Whereas arithmetic deals with specified numbers, algebra introduces quantities without fixed values, known as variables. This use of variables entails a use of algebraic notation and an ...

Durkheim's Two Problems. Durkheim's primary purpose in *The Elementary Forms* was to describe and explain the most primitive religion known to man. But if his interests thus bore some external similarity to those of the ethnographer or historian, his ultimate purpose went well beyond the reconstruction of an archaic culture for its own sake; on the contrary, as in *The Division of Labor* and ...

The simplest class of one-dimensional cellular automata. Elementary cellular automata have two possible values for each cell (0 or 1), and rules that depend only on nearest neighbor values. As a

result, the evolution of an elementary cellular automaton can completely be described by a table specifying the state a given cell will have in the next generation based on the value of the cell to its ...
