### **Instructor Solutions Manual for Fundamentals of Database ...**

- A database management system is designed to allow flexible access to data (i.e., queries), whereas a file-processing system is designed to allow pre-determined access to data (i.e., compiled programs).
- A database management system is designed to coordinate multiple users accessing the same data at the same time.

### **Fourth Edition - Northern India Engineering College**

Traditional database systems often suffered from the so-called impedance mismatch problem, since the data structures provided by the DBMS were incompatible with the programming language's data structures. Object-oriented database systems typically offer data structure compatibility with one or more object-oriented programming languages.
