One of the best TV shows about physics is now on YouTube! Caltech recently announced the release on YouTube of the excellent educational TV show The Mechanical Universe, which gives an accessible but still formal approach to physics and physics history.. The show pioneered the use of technical 3D animations as a way to explain complex math and physics concepts in an accessible way.

The nature of consciousness, the mechanism by which it occurs in the brain, and its ultimate place in the universe are unknown. We proposed in the mid 1990's that consciousness depends on biologically 'orchestrated' coherent quantum processes in collections of microtubules within brain neurons, that these quantum processes correlate with, and regulate, neuronal synaptic and membrane ...

Abiogenesis, or informally the origin of life, is the natural process by which life has arisen from non-living matter, such as simple organic compounds. While the details of this process are still unknown, the prevailing scientific hypothesis is that the transition from non-living to living entities was not a single event, but a gradual process of increasing complexity that involved molecular ...

i dont understand why people want to accept the current limits of mankind. i've been diagnosed with 4 neurological disorders and when people imply that we will never be able to transfer minds into different bodies it feels unfair because they don't have to deal with the crappy body and mind problems i deal with on a daily basis. if they did they wouldn't argue that it was a waste of time ...

Two-part electromagnetic gravitons supply additional rotational kinetic energy to wheels and nuclei that are rotating about horizontal axes, because of two often temporally-slightly-separate downward pulls. Energy production increases according to mass and prior angular speed. The Bessler wheel picked up energy from gravity because of low rotational friction, allowed primarily by the special ...
