Aerodynamics, from Greek ἀήρ aer (air) + δυναμική (dynamics), is the study of motion of air, particularly as interaction with a solid object, such as an airplane wing. It is a sub-field of fluid dynamics and gas dynamics, and many aspects of aerodynamics theory are common to these fields. The term aerodynamics is often used synonymously with gas dynamics, the difference being that ...

The third type of relay is known as an Interlock relay, and it consists of two electromagnetic relays that are constructed in such a way, that when one relay pulls in (is energized), the armature of that relay operates the switches mounted on it, and the armature of the OTHER relay slides over and locks the first armature in its closed position. This holds the switches in the activated state ...
