The area of study known as the history of mathematics is primarily an investigation into the origin of discoveries in mathematics and, to a lesser extent, an investigation into the mathematical methods and notation of the past. Before the modern age and the worldwide spread of knowledge, written examples of new mathematical developments have come to light only in a few locales.

Young children in communities facing socioeconomic disadvantage are increasingly targeted by school readiness interventions. Interventions are stronger if they address stakeholders' priorities, yet children's priorities for early school adjustment are rarely accounted for in intervention design including selection of outcome measures.

The biofilm maturation is the step where it develops into an organized structure which can be flat or mushroom-shaped (), depending on the nutrient source it is reliant upon (Chmielewski & Frank, 2003; Klausen et al., 2003). In order to reach structural maturity, periods of 10 days or more are required (Stoodley, Sauer, et al., 2002). Bacteria grow under sessile form in heterogeneous complex
