Chemistry is too universal and dynamically-changing a subject to be confined to a fixed definition; it might be better to think of chemistry more as a point of view that places its major focus on the structure and properties of substances— particular kinds of matter— and especially on the changes that they undergo.. In some ways, physics might be considered more "fundamental" to the extent ...

I've been playing with a multislope ADC design. Multislope ADC are often used in high end multimeters, and as I have a mild obsession with 8.5 digit multimeters, I wanted to try making a multislope ADC. The current design, such as it is was developed with significant input from EEVBlog users (see this thread). This post documents initial bring up and tests of the first revision of the PCB.
