Reliability is defined as the probability that a device will perform its intended function during a specified period of time under stated conditions. Mathematically, this may be expressed as, $R = \int_0^\infty f(t) dt$, where $f(t)$ is the failure probability density function and t is the length of the period of time (which is assumed to start from time zero).. There are a few key elements of this definition:

an IR thermal imaging camera is a standard tool to be used whenever the NOMTCB does termite pest inspections in New Orleans. Though Jack Leonard has since retired, he perhaps has more experience and was the pioneer in the use of IR cameras in termite detection.

IR Thermography used for the Pest Management Professional

Remote works- 1) because the today's technology allows (kinda), 2) because there is a bunch of

great acoustical software that didn't exist previously (sorta), 3) because Jeff Hedback spent more than six years doing remote Personalized Room Analysis for Auralex Acoustics prior to opening his own shop (partially). The answer is actually that each of these factors play a role in why remote ...

SHI Partners v. Commissioner of Internal Revenue—tax—affirmance—Greenberg. The Third Circuit affirmed today in a tax case. The court rejected an Administrative Procedures Act challenge to the relevant tax regulations because it was based on hindsight, relying on the IRS's practice since adopting the regulations.

Abstract: Sustainable food security is every nation's goal. For a nation to achieve sustainable food security, the food supply must exceed the demand. Using trend analysis, this study is an attempt to compare the nature of food security from 2000 to 2014 in Nigeria to selected African countries in each region.
