Evolution Concept Map - Pinterest

- reproduction is central to what Darwin saw as the basic mechanism of evolution -> natural selection. - means by which the environment filters variations, favoring some over others. - allows for a gradual change in characteristics of a population of organisms overtime.

Honors Biology: Darwin's Theory of Evolution by Natural ...

Darwin. There is no doubt about the fact that the change from a static-typological worldview to a dynamic-evolutionary worldview represents one of the greatest paradigm shifts in the history of ideas. This shift was initiated by the publication of Charles Darwin's 'On the Origin of Species' in 1859, in which he put forth his ideas on the evolution of life.
