Electricity is the set of physical phenomena associated with the presence and motion of matter that has a property of electric charge. In early days, electricity was considered as being not related to magnetism. Later on, many experimental results and the development of Maxwell's equations indicated that both electricity and magnetism are from a single phenomenon: electromagnetism.

NOTE: The following stories seem to describe two kinds of "electric human" phenomena. One involves conventional static electricity, and the other is something more mysterious. If you *DON'T* get constant shocks when touching either people or metal objects, yet electronic devices often fail in your presence, then your problem is not strictly electrical.
