The cost effective solution. I designed a vibration dynamic absorber. Dynamic Absorbers are often overlooked and not used, they can be seen as a band aid or a last option for some vibration problems. Whereas in some cases they can be the only cost efficient option, and they are very effective.

5.4.5 Engineering implications of vibration behavior . The solutions listed in the preceding sections give us general guidelines for engineering a system to avoid (or create!) vibrations. Preventing a system from vibrating: Suppose that we need to stop a structure or component from vibrating e.g. to stop a tall building from swaying.

Dynamics and Vibrations: Notes: Forced Vibrations

Dynamic Solutions Systems, Inc. was founded in 1992 in order to develop and produce low-cost and high-performance vibration analysis and balancing equipment for the Aviation Industry. At the forefront of Aviation Vibration Analysis and Balancing technology, Dynamic Solutions Systems is one of the world's leading suppliers of Vibration Analysis and Test Equipment to the aviation industry.

Hence, the solution to the problem with a square wave is summing the predicted vibration from each one of the harmonic forces found in the frequency spectrum of the square wave. Frequency response model. The solution of a vibration problem can be viewed as an input/output relation - where the force is the input and the output is the vibration.
