Eclipse High Resolution Retina

Is it possible to have Eclipse Juno display at retina resolution? I was able to edit info.plist for previous versions of Eclipse, but this does not work with Juno...

Eclipse Juno and Retina Resolution - Stack Overflow

Eclipse interface icons very small on high resolution screen in Windows 8.1. I've played around with adjusting the screen resolution and other settings in the operating system (Windows 8.1), which helps, but results in other applications appearing too large, and even then the Eclipse icons are uncomfortably small. Enlarging the fonts in the Eclipse preferences (window>preferences>Dialog Font) doesn't affect the icon size.

Eclipse interface icons very small on high resolution ...

Solar Eclipse: High-Resolution Imaging Shows Retinal Damage. Upon examination, she reported having viewed the eclipse with both eyes open when peak obscuration of solar area by the moon was about 70%. She looked at the solar rim several times for approximately 6 seconds without protective eyewear, and then again for approximately 15 to 20 seconds using eclipse glasses from an unknown manufacturer.

Solar Eclipse: High-Resolution Imaging Shows Retinal Damage

SWT now automatically scales images on high-DPI monitors on Windows and Linux, similar to the Mac's Retina support on OS X. In the absence of high-resolution images, SWT will auto-scale the available images to ensure that SWT-based applications like Eclipse are scaled proportionately to the resolution of the monitor.

Learn how to deal with issues for anyone using NetBeans or Eclipse with the new generation of laptops that have extremely high resolution displays on 11, 13 or 15 inch displays. HiDPI refers to the new generation of high resolution displays. A 4K UHD TV is an example of HiDPI and I assume that if ...

HiDPI with Eclipse and NetBeans - JAXenter

Eclipse and other programs with bad resolution on Windows 10 / Parallels / Mac Book Pro. When using external monitor with smaller resolution (1920x1080) the windows are usable. When I switch to MBP Retina Display things get messy. The tabs of applications are tiny, the windows (close, minimize) bigger and text inside browsers or windows huge. Making resolution lower does not help as text becomes blurry.
