A concrete class is a class that can be used to create an object. An abstract class cannot be used to create an object (you must extend an abstract class and make a concrete class to be able to then create an object).

c++ - What is the difference between a concrete class and ...

When the time comes to install a new driveway, the biggest decision is whether to use concrete or asphalt. Sure, there are other driveway material choices — gravel at the low end and brick pavers at the high end — but concrete and asphalt are the most common, and each comes with advantages and disadvantages.. Concrete lasts longer, but asphalt driveways are less expensive to install.
