Gene is a small part of DNA chromosomes house DNA cells are the basic units of life that combine to form tissue. Why do scientists use PCR to make copies of the DNA so you can have a good amount to work with.

HBS 1.3.1. Flashcards | Quizlet

In this lab activity, students will use restriction enzymes to digest the DNA of four suspects in a criminal investigation and separate the DNA samples using agarose gel electrophoresis. Once they have completed the DNA analysis, they will compare the banding patterns for each suspect's DNA to a sample found at the crime scene in an attempt to find the true criminal.

HBS 1.3.1 Activity | Sqworl

Abstract: In the forensic report it was a review of the previous things learned such as, measuring the femur, radius, and humerus. What we had to do is go back and put all the information gathered from the found bones, and put it into a report which would be giving the authorities a age, gender , height,and ethnicity.

Activity 1.3.1 Forensic Case Report - Nelson HBS Portfolio

Activity 1.3.1: Student Response Sheet PART A- Restriction Enzymes Restriction enzymes are a tool that allows us to pinpoint human identity down to single differences in our DNA. Work through the following simulation so you can see these molecular scissors in action. Find out more about restriction enzymes by viewing the animation and reading the article listed below.
