Chapter 17 introduced product costing, the schedule of cost of goods manufactured, and the basic cost flow of a manufacturer. In that preliminary presentation, most cost data (e.g., ending work in process inventory, etc.) were "given." Chapter 18 showed how cost data are used in making important business decisions. How does one determine the cost data for products and services that are the ...

Many ancient civilizations observed astronomical bodies, often the Sun and Moon, to determine times, dates, and seasons. The first calendars may have been created during the last glacial period, by hunter-gatherers who employed tools such as sticks and bones to track the phases of the moon or the seasons. Stone circles, such as England's Stonehenge, were built in various parts of the world ...

Over the years, a variety of floating-point representations have been used in computers. In 1985, the IEEE 754 Standard for Floating-Point Arithmetic was established, and since the 1990s, the most commonly encountered representations are those defined by the IEEE.. The speed of floating-point operations, commonly measured in terms of FLOPS, is an important characteristic of a computer system ...
