Solutions and Mixtures Before we dive into solutions, let's separate solutions from other types of mixtures. Solutions are groups of molecules that are mixed and evenly distributed in a system. Scientists say that solutions are homogenous systems. Everything in a solution is evenly spread out and thoroughly mixed.

The team didn't have the budget to do a full redesign of the machines, so once they had identified a few promising opportunities, they decided to implement a low-fidelity prototype. By applying decals to the exterior of the machine and the walls of the scanning room, they were able to transform the dull, monotone experience into a colorful pirate adventure, where the captain's helm led to ...

- One of my favorite critical thinking and problem solving tools is a good problem statement. You should never just take a problem and rush off in a general direction, thinking you're going to come up with a solution that will satisfy the needs of your requester. Remember, the shortest distance between two points requires you to know where are you starting and where do you want to go?

3.3. Loading Classes. Loading classes is a bit more difficult because we need an instance of a class, not just a pointer to a function.. We cannot create the instance of the class using new because the class is not defined in the executable, and because (under some circumstances) we don't even know its name. The solution is achieved through polymorphism.
