Consciousness And The Brain Deciphering

Specific brain networks are at work when we are conscious. New results can help distinguish truly unconscious patients from those who have some degree of consciousness.

How we identified brain patterns of consciousness

The hard problem of consciousness is the problem of explaining how and why sentient organisms have qualia or phenomenal experiences—how and why it is that some internal states are felt states, such as heat or pain, rather than unfelt states, as in a thermostat or a toaster. The philosopher David Chalmers, who introduced the term "hard problem" of consciousness, contrasts this with the "easy ...

Hard problem of consciousness - Wikipedia

In this Opinion article, we discuss how integrated information theory accounts for several aspects of the relationship between consciousness and the brain.

Classical mentalism. Psychologist Allan Paivio used the term classical mentalism to refer to the introspective psychologies of Edward Titchener and William James.: 263 Despite Titchener being concerned with structure and James with function, both agreed that consciousness was the subject matter of psychology, making psychology an inherently subjective field.

Mentalism (psychology) - Wikipedia

According to Parnia during this period, "You lose all your brain stem reflexes — your gag reflex, your pupil reflex, all that is gone." Brain waves from the cerebral cortex soon become undetectable.

The Soul of an Octopus - Sy Montgomery

Understanding the Brain, takes you inside the astonishingly complex human brain and shows you how it works, from the gross level of its organization to the molecular level of how cells in the brain communicate.

Understanding the Brain | The Great Courses

We argue that subjective emotional experience, the feeling, is the essence of an emotion, and that objective manifestations in behavior and in body or brain physiology are, at best, indirect indicators of these inner experiences.

The subjective experience of emotion: a fearful view ...

Pleasure is mediated by well-developed mesocorticolimbic circuitry and serves adaptive functions. In affective disorders, anhedonia (lack of pleasure) or dysphoria (negative affect) can result from breakdowns of that hedonic system. Human neuroimaging studies indicate that surprisingly similar circuitry is activated by quite diverse pleasures, suggesting a common neural currency shared by all.
