Deforestation in Sub-Saharan Africa

Other impacts. Deforestation affects climate change on a large scale, as discussed in the sections above; however, climate change is not the only negative consequence of deforestation.

Deforestation and Climate Change - Climate Institute

As of 2005, Nigeria has the highest rate of deforestation in the world according to the Food and Agriculture Organization of the United Nations (FAO). Between 2000 and 2005 the country lost 55.7% of its primary forests, and the rate of forest change increased by 31.2% to 3.12% per annum. Forest has been cleared for logging, timber export, subsistence agriculture and notably the collection of ...

Deforestation in Nigeria - Wikipedia

Brazil once had the highest deforestation rate in the world and in 2005 still had the largest area of forest removed annually. Since 1970, over 700,000 square kilometers (270,000 sq mi) of the Amazon rainforest have been destroyed. In 2012, the Amazon was approximately 5.4 million square kilometres, which is only 87% of the Amazon's original state.
