Alarm management is the application of human factors (or 'ergonomics') along with instrumentation engineering and systems thinking to manage the design of an alarm system to increase its usability. Most often the major usability problem is that there are too many alarms annunciated in a plant upset, commonly referred to as alarm flood (similar to an interrupt storm), since it is so similar to a ...

Newsroom | Symantec

IT Financial Management comprises the discipline of ensuring the IT infrastructure is obtained at the most effective price (which does not necessarily mean cheapest) and calculating the cost of providing IT services so an organization can understand the costs of its IT services. These costs may then be recovered from the customer of the service. This is the second component of the service ...
