Competition between Paramecium species Last Updated on Thu, 09 May 2019 | Species Richness The fourth example comes from the classic work of the great Russian ecologist G. F. Gause, who studied competition in laboratory experiments using three species of the protozoan Paramecium (Gause, 1934, 1935).

#### **Competition between Paramecium species - Species Richness**

Model 2 – Microcosm This model is a simulation which draws upon Gauss' (1934) classic experiments with protists. In this virtual petri dish, you can add bacteria, two species of Paramecium, and a predator. The two Paramecium (P. aurelia & P. bursaria) species compete for resources. One of the species is a better competitor for bacteria, while the other has photosynthetic endosymbionts and ...

#### **Community Ecology - Virtual Biology Lab**

Lab # : Virtual Lab – Population Biology. Problem How does competition affect population growth? Background (Read the background in order to answer the Pre-Lab Questions that follow) . The genus. Paramecium. includes several species of one-celled protists that live in freshwater.

#### **Objectives - Northern Highlands**

Virtual Paramecium Population Lab (Due: Friday, 10/13) ... Copy down the Problem Question on your lined paper: "How does competition in paramecium ... Follow the procedures for the virtual lab and copy the data down into your table on your lined paper as you go.

#### **Virtual Paramecium Population Lab - Mr. G's Home Page**

Virtual Lab: Population Growth Biology Background How does competition affect population growth? The genus Paramecium consists of unicellular species of protists that live in freshwater

environments. Under ideal conditions - enough food, water, and space - populations of these species grow rapidly and
