Final Action of Conformance with Federal Regulation: Designated Forage Fish (Shared Ecosystem Component Species), Section 111, Title 14, CCR. The state regulations establish the list of included species, define directed commercial fishing, and set vessel-based catch limits for incidental take of forage species within existing commercial fisheries. Species affected by the new regulations include round and thread herring, eulachon, lanternfish, pelagic squids and some smelts.

### **Designated Forage Fish (Shared Ecosystem Component Species)**

Biodiversity provides fundamental ecosystem services that are of paramount importance for human well-being and consider humans as part of the marine ecosystem. Hence, understanding the relationships between human activities and their various impacts on marine ecosystems are also relevant to the specialty section Marine Ecosystem Ecology.

### **Marine Ecosystem Ecology - Frontiers**

The Marine Mammal Protection Act (MMPA) was the first legislation to mandate an ecosystem-based approach to marine resource management. Under the MMPA, Congress directed that the primary

objective of marine mammal management should be to maintain the health and stability of the marine ecosystem and, when consistent with that primary objective, to obtain and maintain optimum sustainable populations of marine mammals.

### **Marine Mammal Protection Act - Marine Mammal Commission**

\_\_\_\_ 7. An ecosystem is defined by the a. organisms living in a particular area. b. climate of the region. c. community and physical aspects of the area. d. pioneer species that occupy the area.
