Skills Worksheet Directed Reading A

In this lesson, we read about how scientists classify the animal kingdom. The animal kingdom is broken into two smaller groups - vertebrates and invertebrates. These two kingdoms are broken down even further. There are 5 groups of vertebrates: mammals, reptiles, amphibians, birds, and fish.

Chapter 1 - Classifying Living Things

appropriate key. A key is literally a structural map of a phylum, class, genus, species, and other taxonomic unit. It operates by successfully eliminating choices until the correct choice is reached. It is obvious that the more detailed a key is, the more accurate it is and the smaller the systematic unit will be in which the key will place an animal.

CLASSIFICATION LAB ANSWER SHEET

Welcome 7th Grade Scientists 2018-19 Hope your summer was as fabulous as mine. I watched baby Bald Eagles take their first flight from their nest, saw Osprey catch fish for their young, found a

huge dead sea lion on the beach, and helped protect the Western Snowy Plover.
