Complex Number. The complex numbers are the field of numbers of the form, where a and b are real numbers and i is the imaginary unit equal to the square root of -1 . When a single letter is used to denote a complex number, it is sometimes called an "affix." In component notation, z can be written $z = a + bi$. The field of complex numbers includes the field of real numbers as a subfield.

In this chapter we will start looking at second order differential equations. We will concentrate mostly on constant coefficient second order differential equations. We will derive the solutions for homogeneous differential equations and we will use the methods of undetermined coefficients and variation of parameters to solve non homogeneous differential equations.
