Solutions: What are solutions, examples of solutions, strength of solutions, what is the universal solvent? Suspensions, emulsions, colloids: What are suspensions, emulsions and colloids. Examples of colloids. Hyrocolloids: Hydrocolloid have colloid particles spread throughout water, and depending on the quantity of water available can take place in different states

Because the size of the dispersed phase may be difficult to measure, and because colloids have the appearance of solutions, colloids are sometimes identified and characterized by their physico-chemical and transport properties. For example, if a colloid consists of a solid phase dispersed in a liquid, the solid particles will not diffuse through a membrane, whereas with a true solution the ...

Product Reports. Skip to the Lab Analysis Summary. There are three distinctly different types of silver that are labeled and sold on the market as "colloidal silver"; they are ionic silver, silver protein, and true colloidal silver. Consumers seeking true colloidal silver are often at a disadvantage because each of these products represents themselves as colloidal silver.

A dilatant (/daɪlətənt/) (also termed shear thickening) material is one in which viscosity increases with the rate of shear strain. Such a shear thickening fluid, also known by the initialism STF, is an example of a non-Newtonian fluid. This behaviour is usually not observed in pure materials, but can occur in suspensions.

Solutions and suspensions are two forms of mixtures. The key difference between solution and suspension is that the particles of a solution are invisible to the naked eye whereas the particles of the suspension are visible. As another important difference between solution and suspension, a solution is a homogeneous...

Flocculation and sedimentation are technological processes used by Veolia Water Technologies South Africa (Veolia) within water treatment cycles to make water safe to drink or for water reuse. Flocculation and sedimentation cannot occur without coagulation, and some of Veolia's patented Hydrex® water treatment chemicals are used to facilitate all of these processes.
