Equivalently (by Exercise 1.17), a root of unity is a complex number z such that $z^n = 1$ for some positive integer n . In this case, we call z an n th root of unity. If n is the smallest positive integer with the property $z^n = 1$ then z is a primitive n th root of unity. Example 1.4.

"Visual Complex Analysis is a delight, and a book after my own heart. By his innovative and exclusive use of the geometrical perspective, Tristan Needham uncovers many surprising and largely unappreciated aspects of the beauty of complex analysis."
