1. Introduction. Aptamers are short synthetic ribo- and deoxyribonucleic acids that were first described in the early 1990s (Ellington and Szostak, 1990, Tuerk and Gold, 1990) and quickly became well-developed tools for various applications in research, diagnosis and therapy. The name "aptamer" comes from the Greek aptus, i.e. "to fit", and merus, i.e. "particle".

Selection Simply put, selection occurs when some genotypes in the population are on average more successful in reproduction. These genotypes may survive better, produce more offspring, or be more successful in attracting mates; the alleles responsible for these traits are then passed on to offspring.

"Francis Crick and I made the discovery of the century, that was pretty clear. We made it, and I guess time has justified people paying all this respect to me in spite of my bad manners." James Watson was only 25 years old when he and his older colleague, Francis Crick, discovered the structure of deoxyribonucleic acid (DNA) the building block of all life on Earth.
