### **LANDR**

Mastering, a form of audio post production, is the process of preparing and transferring recorded audio from a source containing the final mix to a data storage device (the master), the source from which all copies will be produced (via methods such as pressing, duplication or replication).

### **Mastering (audio) - Wikipedia**

Since the resurgence of vinyl in the mid-2000s, vinyl sales have shown no signs of slowing down. But with its return comes a new set of challenges for the aging medium—new genres with increasingly complex production styles, the major paradigm shift from analog to digital production, and evolving audio mastering standards (just to name a few).
