Near-field communication (NFC) is a set of communication protocols that enable two electronic devices, one of which is usually a portable device such as a smartphone, to establish communication by bringing them within 4 cm (1.6 in) of each other.. NFC devices are used in contactless payment systems, similar to those used in credit cards and electronic ticket smart cards and allow mobile ...

Human to human communication. Human communication is the basic example of interactive communication which involves two different processes; human to human interactivity and human to computer interactivity. Human-Human interactivity is the communication between people. On the other hand, human to computer communication is the way that people communicate with new media.

What is Communication? The Merriam-Webster dictionary defines communication as the act or process of using words, sounds, signs, or behaviors to express or exchange information or to express your ideas, thoughts, feelings, etc., to someone else.. This is a very broad definition but it does manage to encompass everything that makes up the concept of communication.
