CS609 GDB Solution. The optimal method of storing a file on a disk is in a contiguous series, i.e. all data in a stream stored end-to-end in a single line. As many files are larger than 512 bytes, it is up to the file system to allocate sectors to store the file's data. For example, if the file size is 800 bytes,...

Answer: In this opinion, DSSS is more suitable for the given scenarios . The reason are follows. The data transmission rate is full-band mode, and in the future, it will result in higher frequency transmission rate. DSSS transmission rate is high, so less no. of DSSS devices are required as compared to FHSS. The cost of DSSS is low because of less no. of devices. It provide better security ...
