Respiratory System Educational Videos | WatchKnowLearn

The gastrointestinal tract (digestive tract, digestional tract, GI tract, GIT, gut, or alimentary canal) is an organ system within humans and other animals which takes in food, digests it to extract and absorb energy and nutrients, and expels the remaining waste as feces. The mouth, esophagus, stomach and intestines are part of the gastrointestinal tract.

Gastrointestinal tract - Wikipedia

Digestive system disease - Large intestine: A wide variety of diseases and disorders occur in the large intestine. Abnormal rotation of the colon is fairly frequent and occasionally leads to disorders. Unusually long mesenteries (the supporting tissues of the large intestine) may permit recurrent twisting, cutting off the blood supply to the involved loop.

Digestive system disease - Large intestine | Britannica.com

The prepatent period of *O. ostertagi* is normally ~3 wk. Ingested larvae enter the lumen of the abomasal glands and molt by the fourth day; they remain there during the prepatent period, growing and undergoing a final molt before emerging as young adult worms from the gastric glands onto the abomasal mucosa. During this time, the specialized cells (pepsinogen-producing zymogen cells, acid ...
