A laboratory information management system (LIMS), sometimes referred to as a laboratory information system (LIS) or laboratory management system (LMS), is a software-based solution with features that support a modern laboratory's operations. Key features include—but are not limited to—workflow and data tracking support, flexible architecture, and data exchange interfaces, which fully ...

Laboratory information management system - Wikipedia

CAD/CAM dental systems refers to the software used to both design and mill dental prosthetics. CAD (Computer Aided Design) includes digitally scanning and designing prosthetics, while CAM (Computer Aided Manufacturing) is the process of sending final models to the output device and manufacturing them through milling or 3D printing.

Cosmetic dentistry is generally used to refer to any dental work that improves the appearance (though not necessarily the functionality) of teeth, gums and/or bite. It primarily focuses on improvement in dental aesthetics in color, position, shape, size, alignment and overall smile appearance. Many dentists refer to themselves as "cosmetic dentists" regardless of their specific education ...
