Assume that the plant you identified as being closely related to *Botana curus* grows rapidly, survives in many environments, and produces Curol. News reports indicate that *Botana curus* plants may become extinct unless expensive efforts are made to preserve the species. Members of your research team disagree as to whether or not *Botana curus* should be saved.

Genome editing, or genome engineering, is a type of genetic engineering in which DNA is inserted, deleted, modified or replaced in the genome of a living organism. Unlike early genetic engineering techniques that randomly inserts genetic material into a host genome, genome editing targets the insertions to site specific locations.. In 2018, the common methods for such editing use engineered ...

Recent medical studies have shown that the fetus most certainly does feel pain by the end the second trimester, when late-term and partial birth abortions are performed. Since most of these procedures do not use anesthesia for the fetus, it likely feels pain during the procedure as limbs may be pulled off and scissors are used to puncture the base of its skull.
