An economic system (also economic order) is a system of production, resource allocation and distribution of goods and services within a society or a given geographic area. It includes the combination of the various institutions, agencies, entities, decision-making processes and patterns of consumption that comprise the economic structure of a given community.

Economic system - Wikipedia

Rethinking Industries – Biobased Products and Bioeconomy. Dependence on fossil raw materials is still widely spread throughout the industry. For example, most cars are still running on fossil fuel, plastic is mainly derived from fossil energy carriers and energy itself is mostly generated by nonrenewable resources.
