Periodic Table Trends. In addition to the common properties of elements in groups and periods, the chart organizes elements according to trends in ionic or atomic radius, electronegativity, ionization energy, and electron affinity. Atomic radius is half the distance between two atoms that are just touching.

Clickable Periodic Table of the Elements - ThoughtCo

The properties of the elements are a periodic function of their atomic weights. Mendeleev arranged elements in horizontal rows and vertical columns of a table in order of their increasing atomic weights in such a way that the elements with similar properties occupied the same vertical column or group.
