This interactive simulation lets students investigate simple collisions in one dimension or more complex scenarios. The simpler experiment explores the meaning of elastic vs. inelastic collisions, while the 2D model integrates the Law of Conservation of Momentum to solve problems.

PhET Collision Lab - ComPADRE

The purpose of this lab will be to determine the mass of the cargo carried on a low friction cart by analyzing its momentum during an elastic collision. The momentum will be calculated by recording and analysing a video, in LoggerPro3.6, of an elastic collision with two carts, one with the cargo and one with a known mass.
