The Semantic Web is an extension of the World Wide Web through standards by the World Wide Web Consortium (W3C). The standards promote common data formats and exchange protocols on the Web, most fundamentally the Resource Description Framework (RDF). According to the W3C, "The Semantic Web provides a common framework that allows data to be shared and reused across application, enterprise, and ...

Now that we have the tools to superpower our layouts, we can start to reimagine how we approach art direction and design on the web. By taking advantage of technologies, some new and some overlooked, we can create a progressively-enhanced design that's powered by feature queries; one that's localized for an increasingly global audience.
