The Rename operations in visual studio only change the filename, i.e. for a project, *.prj and for a solution *.sln. You will need to rename folders separately using the filesystem, and you will need to remove and readd the projects since they will have new folder names.

Proper way to rename solution (and directories) in Visual ...

NOTE: In this example code we open a directory and search for PDF files with open and closed parenthesis in the name of the file. You can check and replace any character in the name you like or just specify a whole new name using replace functions. There are other ways to work from this code to do more elaborate renames but my main intention was to show how to use File.Move to do a batch rename.
