Digital Video Resolution

Digital video is an electronic representation of moving visual images in the form of encoded digital data. This is in contrast to analog video, which represents moving visual images with analog signals. Digital video comprises a series of digital images displayed in rapid succession.. Digital video was first introduced commercially in 1986 with the Sony D1 format [citation needed], which ...

Digital video - Wikipedia

4K resolution, also called 4K, refers to a horizontal display resolution of approximately 4,000 pixels. Digital television and digital cinematography commonly use several different 4K resolutions. In television and consumer media, 3840 × 2160 (4K UHD) is the dominant 4K standard, whereas the movie projection industry uses 4096 × 2160 (DCI 4K). ...

If you think of resolution only in terms of megapixels, you may not realize that any digital camera can make high-resolution photos. Resolution merely refers to the number of pixels per inch, which makes "high" and "low" terms that are relative, not only to the dimensions of the image, but to what the viewer believes is detailed enough.
