Cross Connect Solutions Colocation

Cross-connections are hardware (cables, cords, and jumpers) that connect separate units of the facilities within a data center. They are usually maintained by a single data center or across multiple data centers, and can be used for many purposes: Trading companies may use hundreds of cross-connections between servers to ensure trades are done as quickly as possible.

What Does "Cross Connect" Means in Data Centers ...

"I've been in the web hosting business since the beginning of the Internet, I have dealt with several Network Centers and nothing comes close to ColocationGuard's top-notch support.
