The 1837 Great Plains smallpox epidemic spanned 1836 through 1840, but reached its height after the spring of 1837 when an American Fur Company steamboat, the S.S. St. Peter, carried infected people and supplies into the Missouri Valley. More than 17,000 Indigenous people died along the Missouri River alone, with some bands becoming nearly extinct. ...

Deforestation, clearance, clearcutting or clearing is the removal of a forest or stand of trees from land which is then converted to a non-forest use. Deforestation can involve conversion of forest land to farms, ranches, or urban use. The most concentrated deforestation occurs in tropical rainforests. About 31% of Earth's land surface is covered by forests.

Australia - Land: Australia is both the flattest continent and, except for Antarctica, the driest. Seen from the air, its vast plains, sometimes the colour of dried blood, more often tawny like a lion's skin, may seem to be one huge desert. One can fly the roughly 2,000 miles (3,200 km) to Sydney from Darwin in the north or to Sydney from Perth in the west without seeing a town or anything ...

Beef production is immensely wasteful in terms of energy, massive environmental degradation, and diverting good land and crops away from feeding people to feeding cattle. It is a massive sector, primarily to produce for unhealthy consumption, yet takes up so much of the world's resources. It used to be a luxury item but now is consumed regularly.
